WHEEL LOADER | 413S

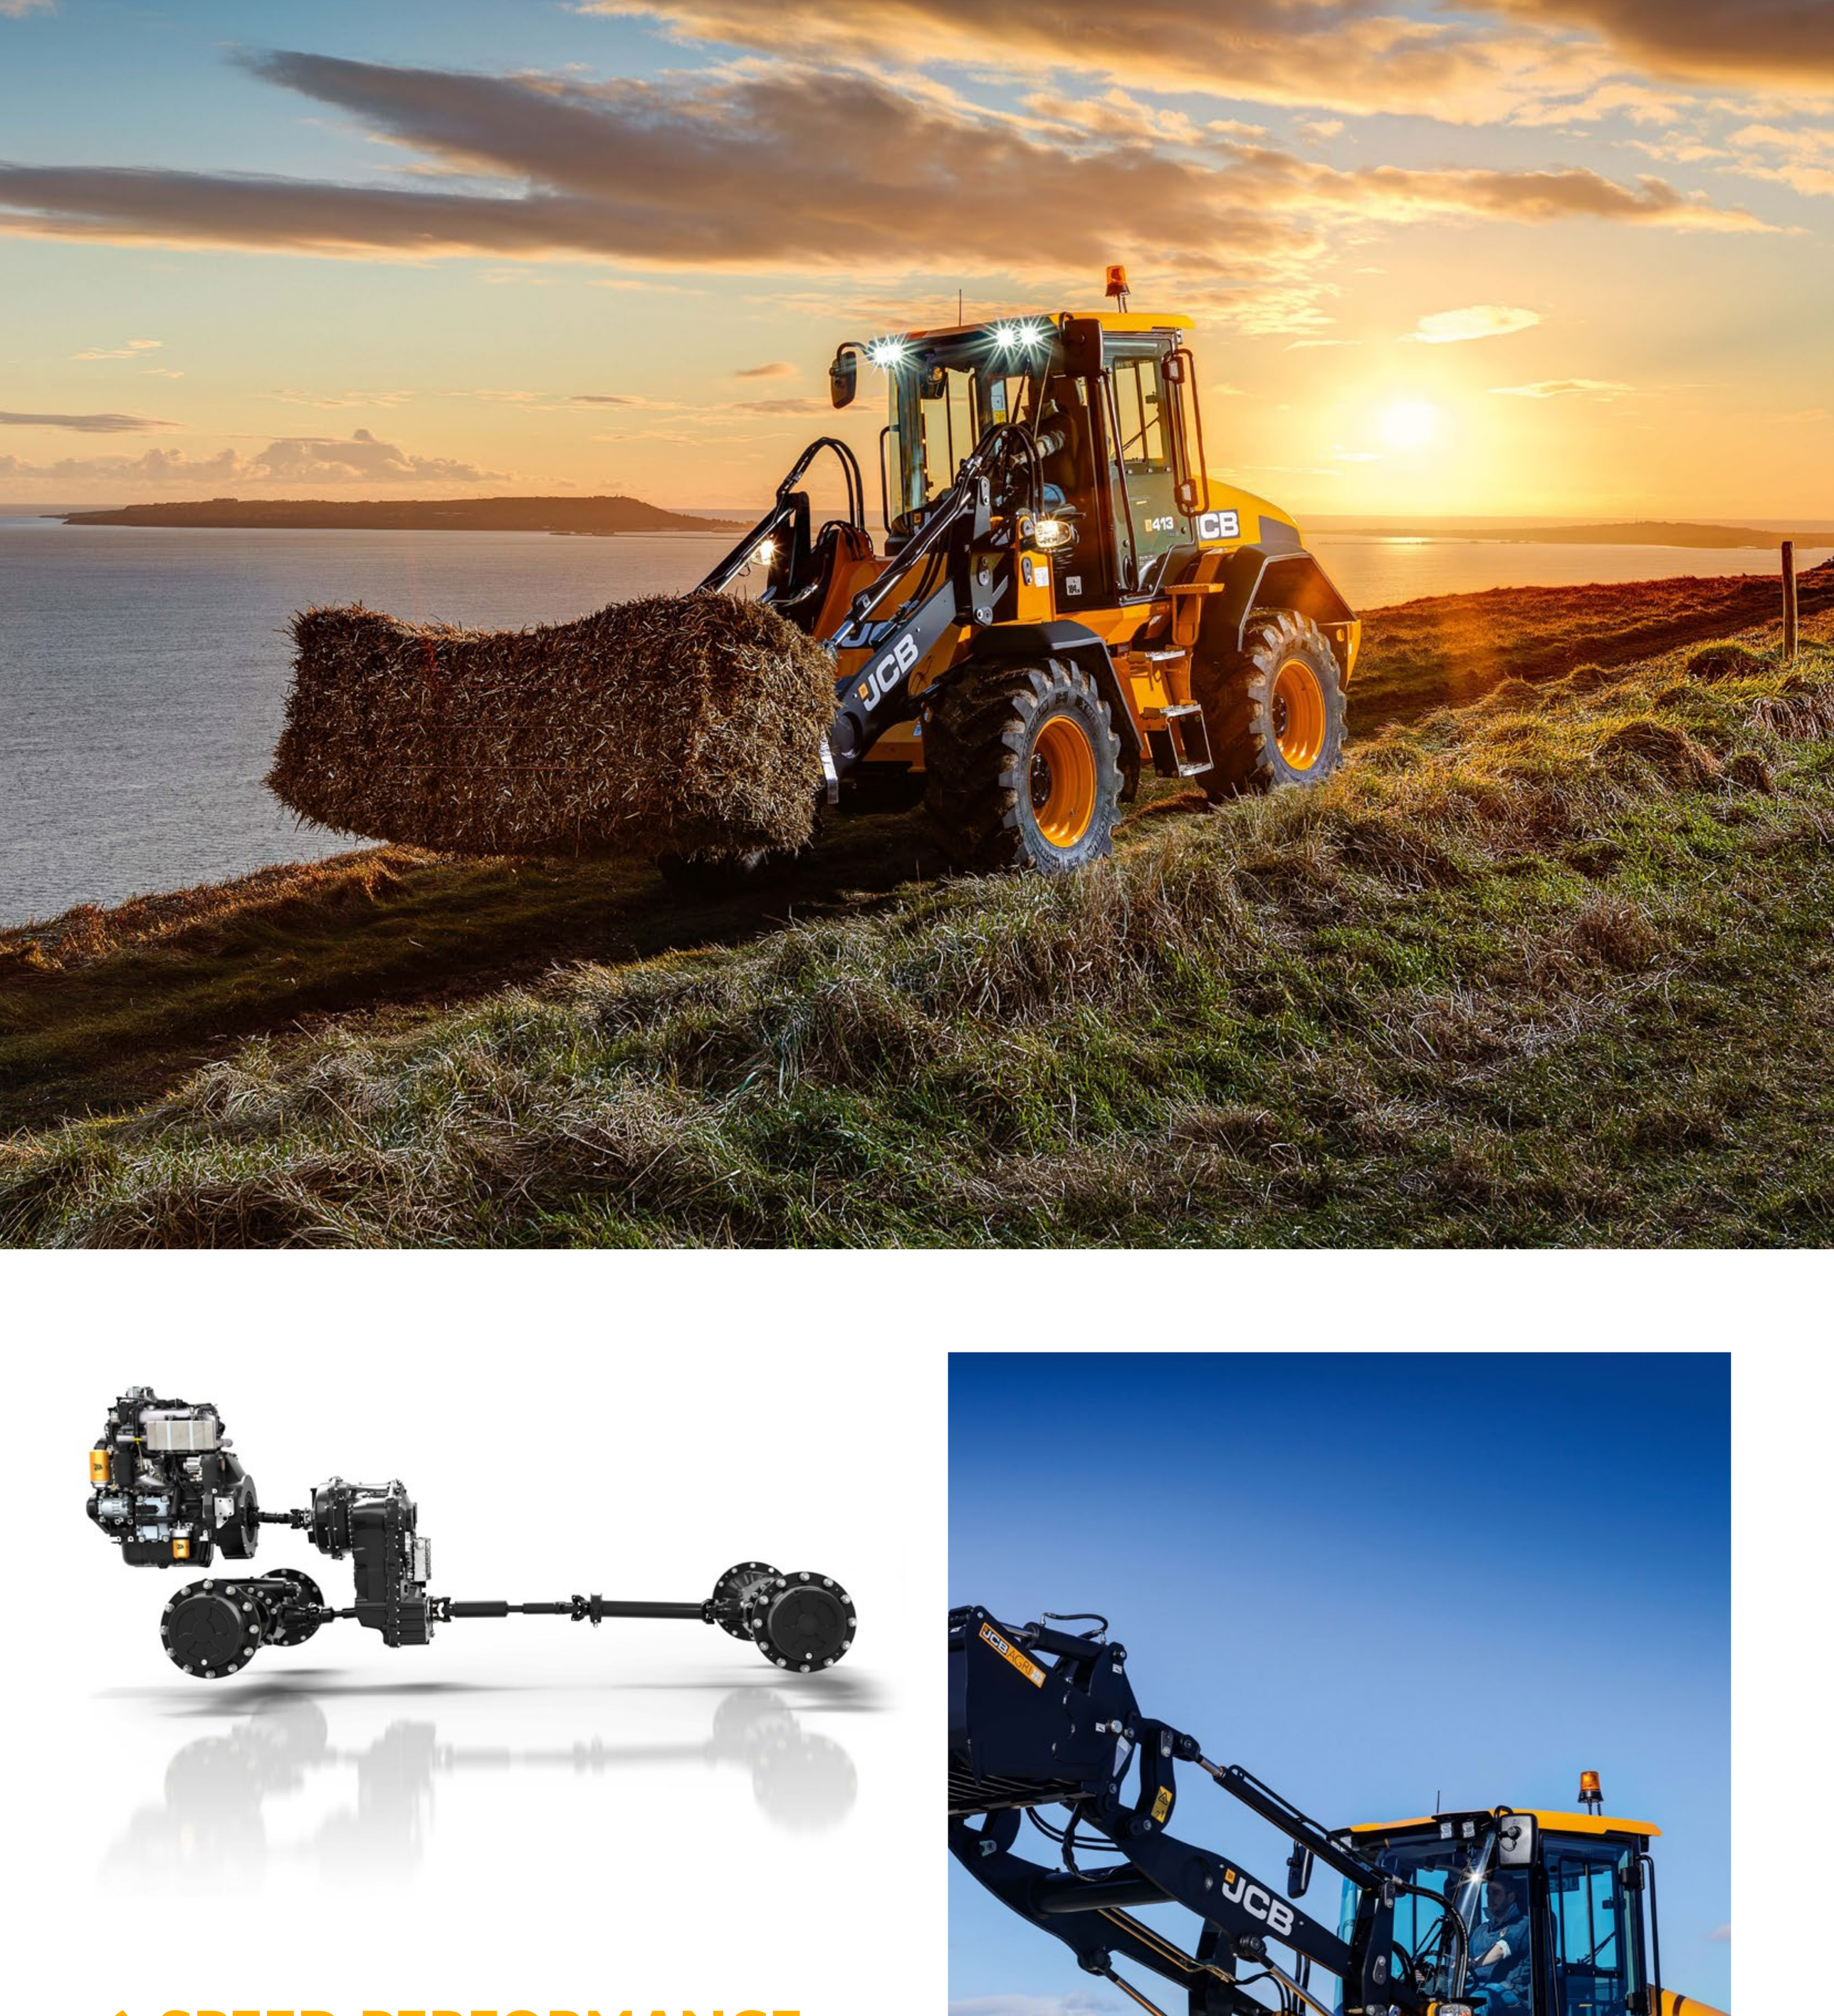
JCB

STAGE V

OPERATING WEIGHT	ENGINE POWER	SHOVEL SIZE
9,276kg	112kW	1.6m³

LOADS MORE PRODUCTIVITY

The 413S delivers 150hp and weighs under 9 tonnes, giving a huge power-to-weight ratio of 16.8hp per tonne, for loads more pushing, climbing and roading performance.



6-SPEED PERFORMANCE

Our unique 6-speed transmission provides closer gear ratios, for better acceleration, hill climbing and roading performance up to 48kph.

LOADS MORE QUALITY

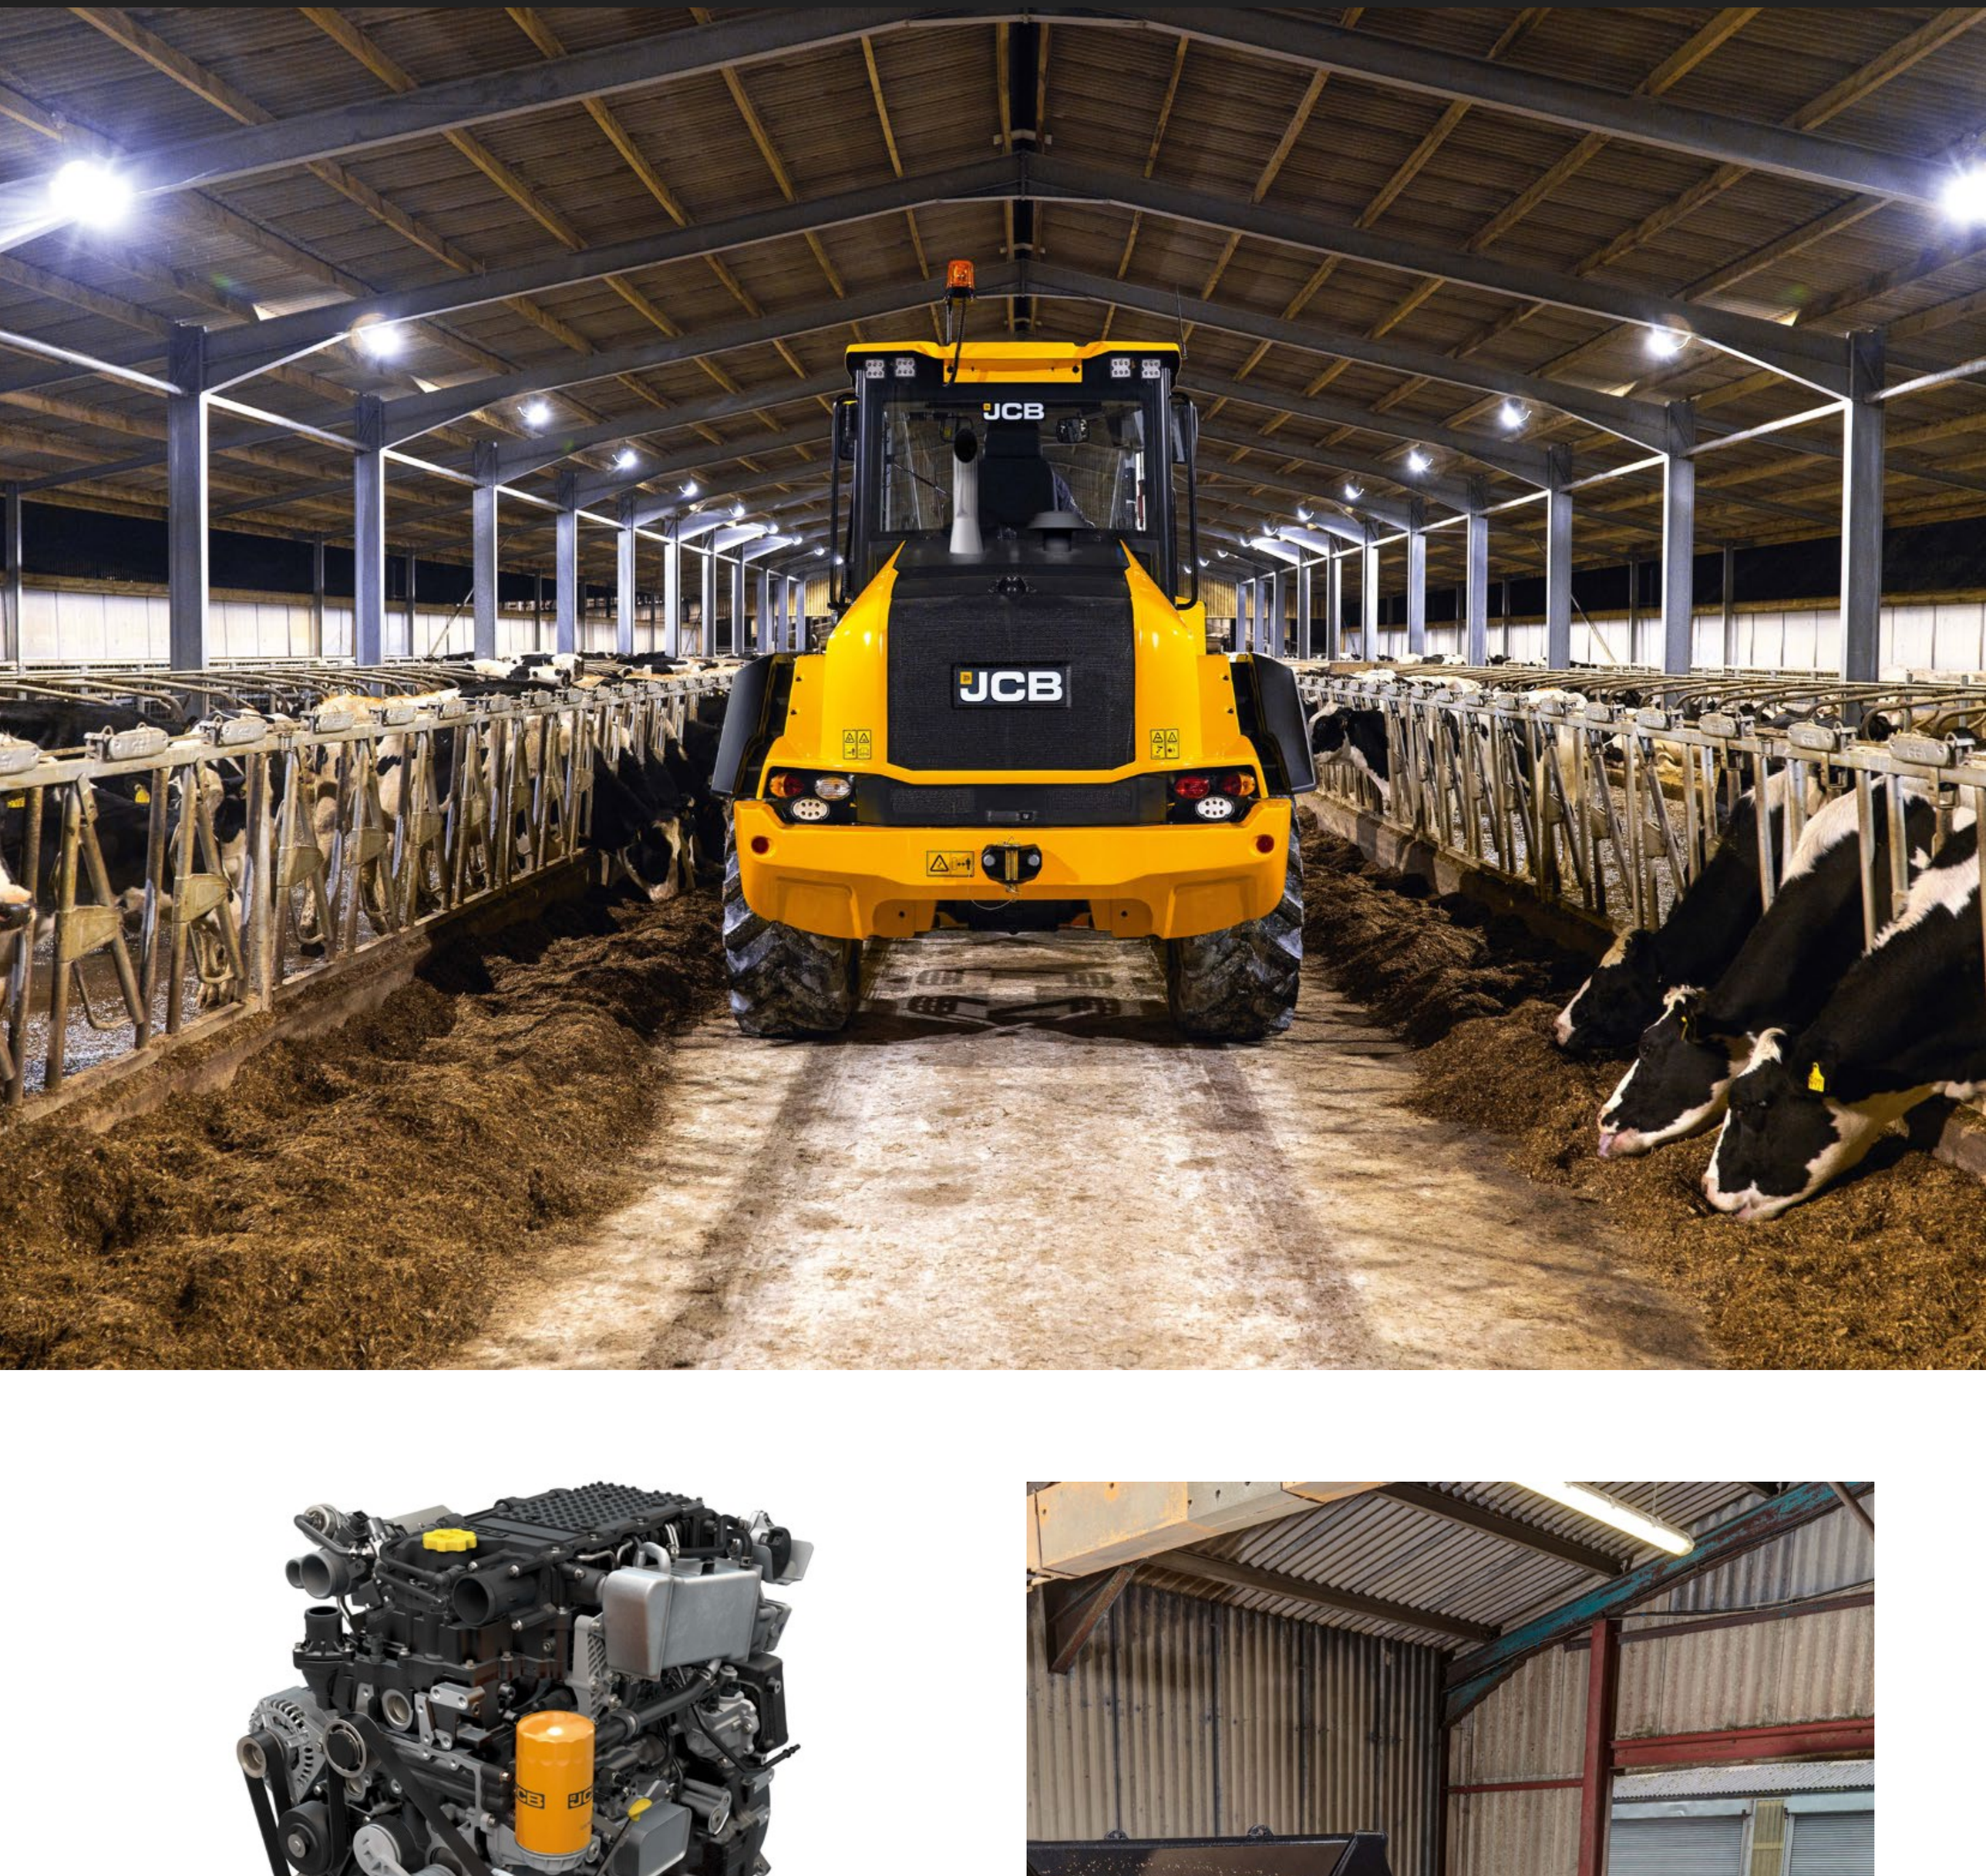
We've built in loads more quality and reliability into the 413S using the latest design techniques, rigorous testing and state-of-the-art manufacturing processes.

BUILT TO LAST

A solid cast counterweight protects the back of the machine, rear lights and cooling pack from damage.

LOADS MORE EFFICIENCY

By designing the engine, axles, driveline and hydraulics to work in harmony with each other, the 413S is built to move loads more material for less.



FUEL SAVING

Our auto engine shutdown feature saves fuel by switching off the engine when the machine is left idling.

LOADS MORE COMFORT

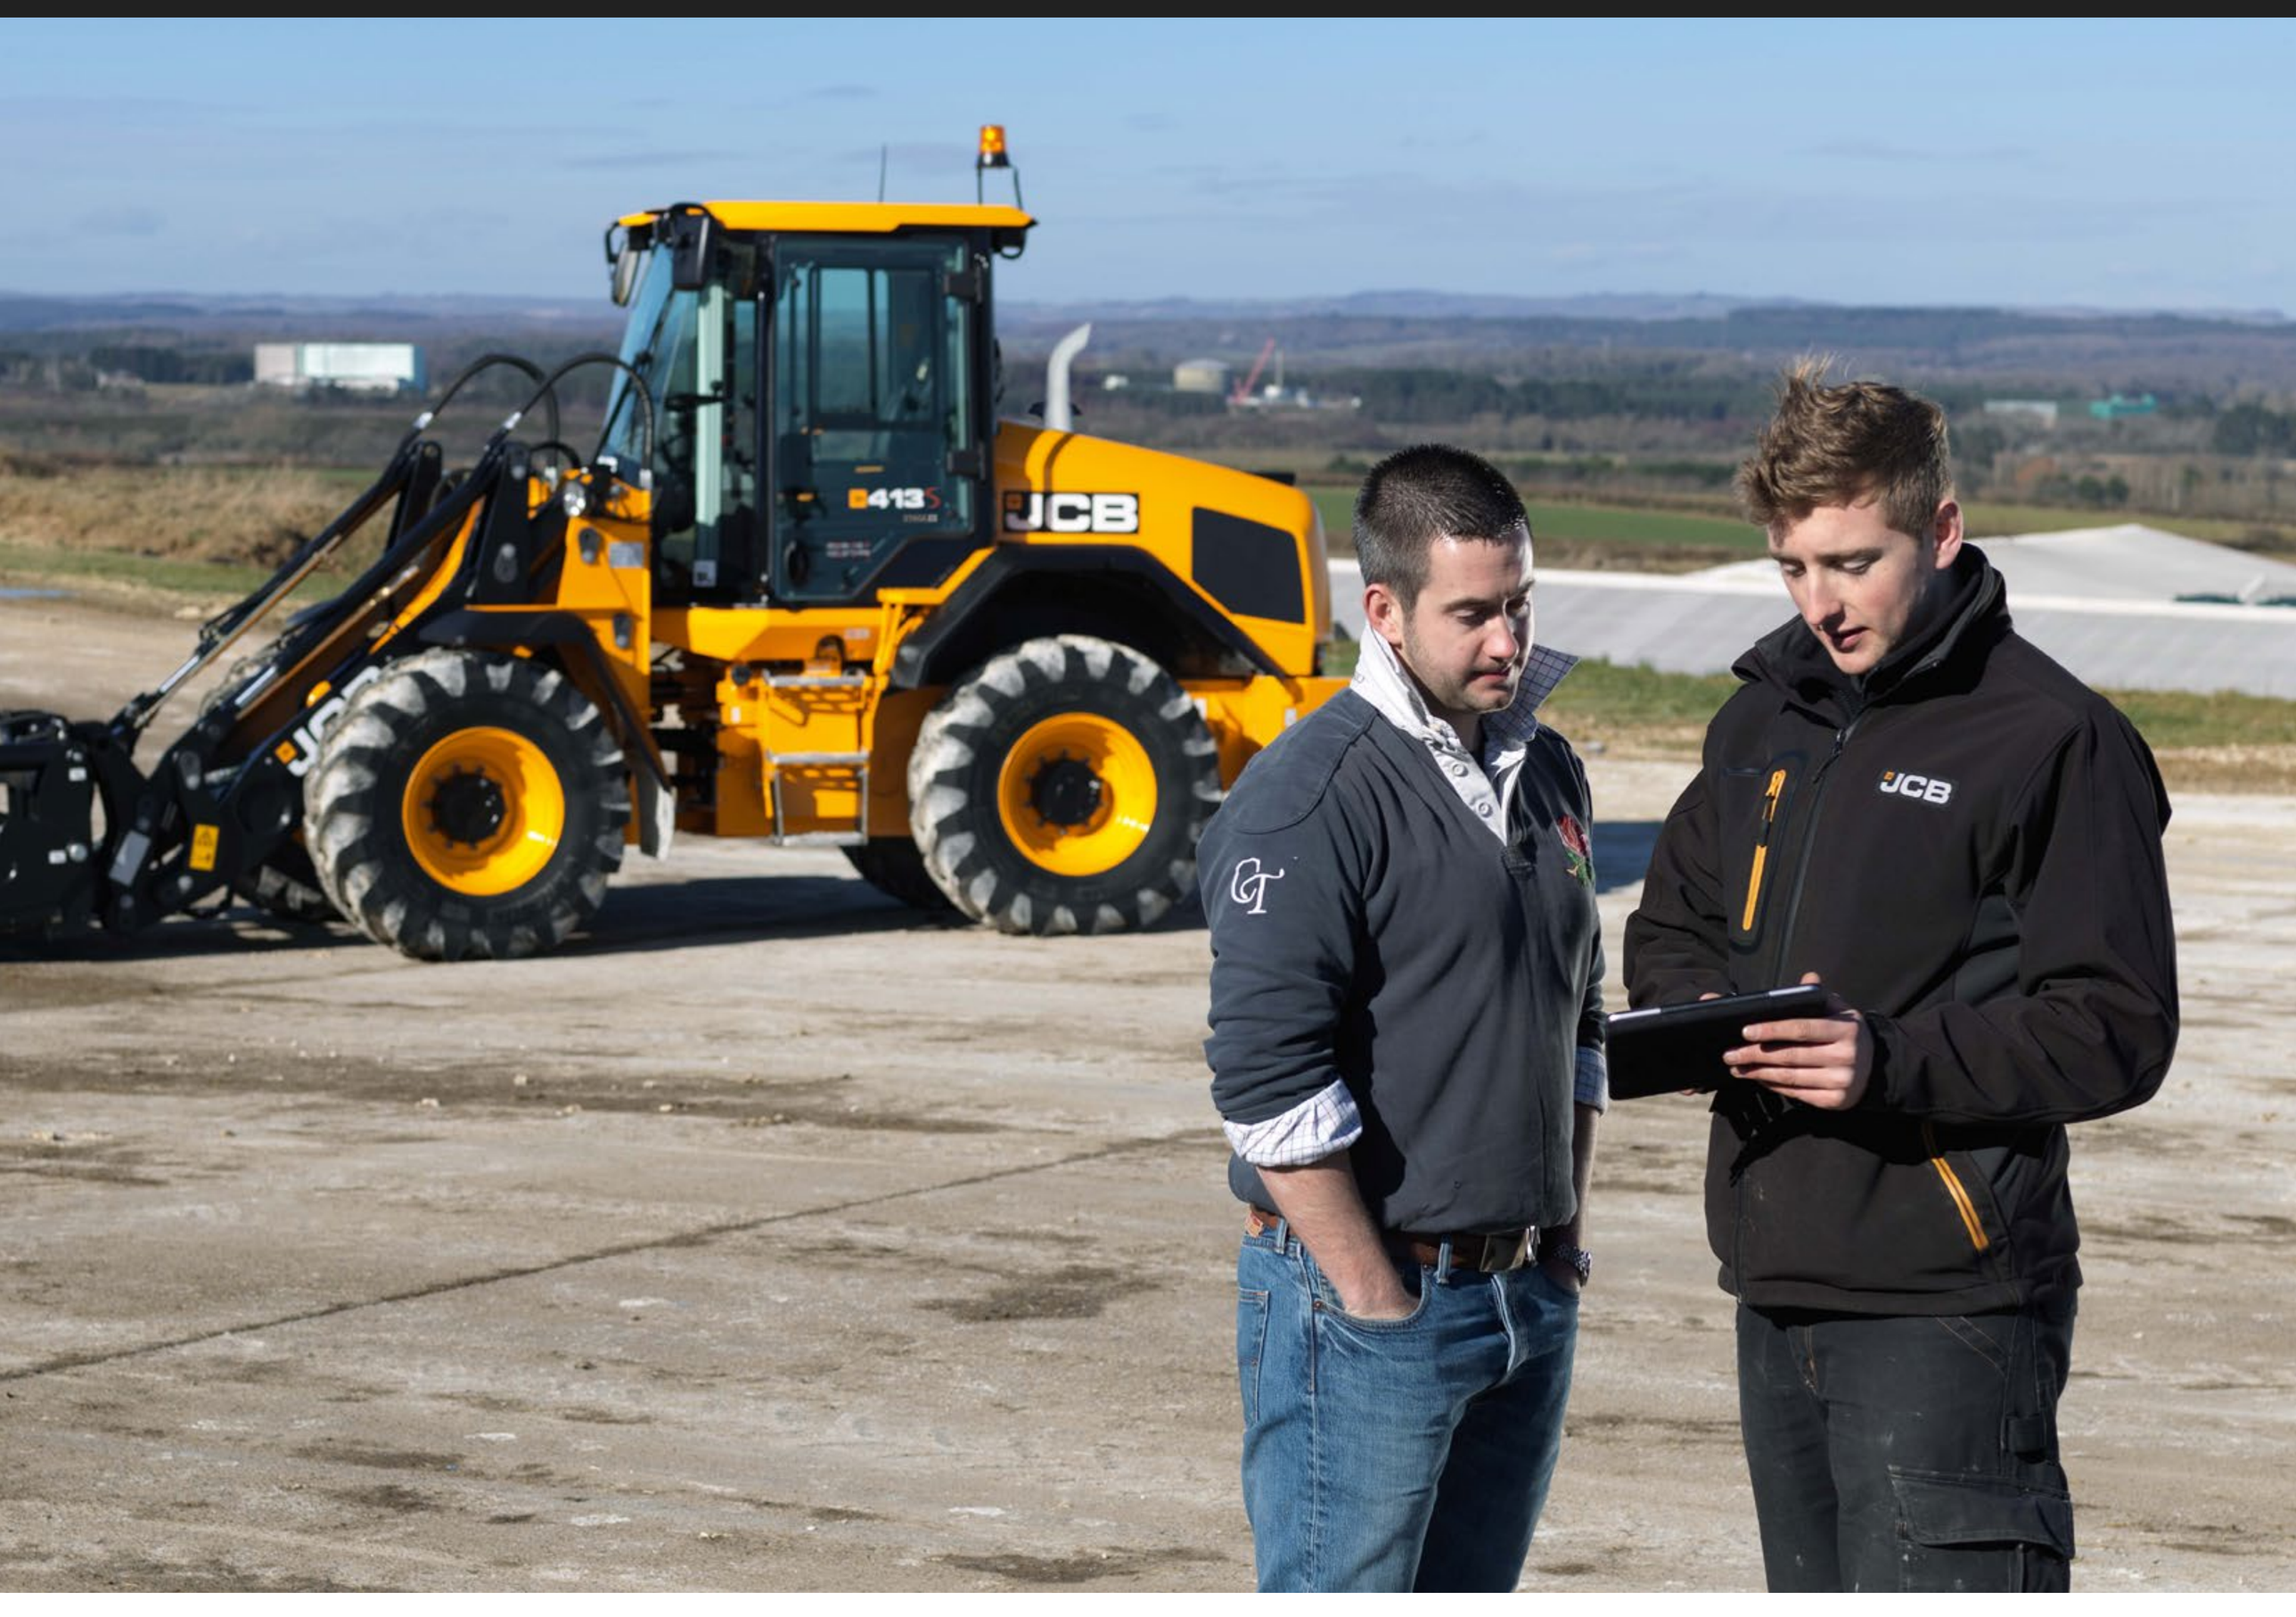
One of the best designed cabs on the market provides an optimal control layout, giving the operator loads more comfort and visibility, enabling even greater productivity.

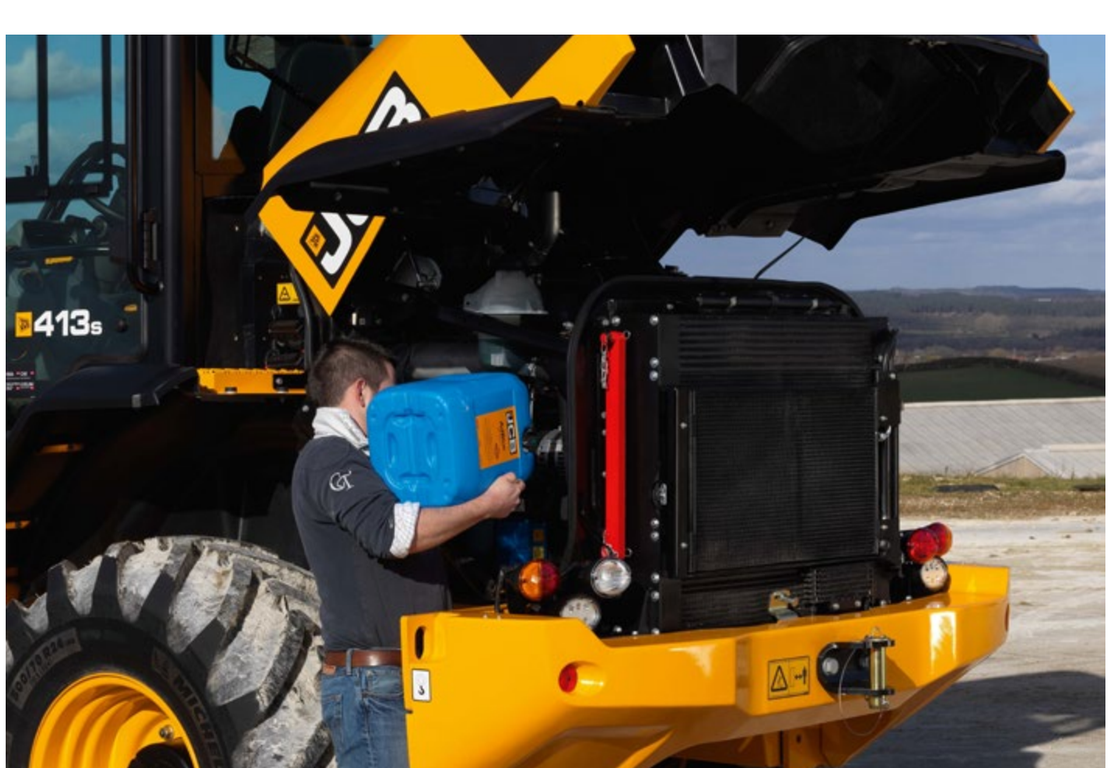
SEE THE DIFFERENCE

Operating the loader is easy, with seat-mounted controls that move with the seats suspension.

LOADS MORE UPTIME

Wheel loaders need to spend the maximum amount of time working. That's why we've designed the 413S with long service intervals and quality components.





ROUTINE MAINTENANCE

Accessing the diesel and DEF tanks is easy, via a lockable grille at the rear of the machine.

WHEEL LOADER | 413S

SPECIFICATION

MODEL		**413S**
Standard shovel size	m^3	**1.6**
FTTL	kg	**5,478**
Engine power	kW/hp	**112/150**
Transmission (powershift)		**6 speed**
Travel speed	kph	**40kph**
Operating weight	kg	**9,276**

STANDARD FEATURES

- CommandPlus cab
- Air suspension seat
- High spec display with integrated rear view camera
- Joystick loader control
- Air-conditioning
- Auto engine shutdown
- Widecore cooling package
- 6-speed powershift transmission - 40kph
- 1 auxiliary service
- LiveLink telematics
